

# L.O.C PRO ADVANCED

Line Output Converter

## LPA-2.2 | 2 Channel Line-Output Converter

## LPA-2.4 | 4 Channel Line-Output Converter

### Quick Start Guide

The L.O.C.PRO ADVANCED™ can be used to add amplifiers to an audio system that does not have RCA outputs or when replacing an OEM radio and retaining the factory amplified system. Variable Gain Controls with Clipping Indicators, Selectable Ground Isolation and Load Select features ensure a pure, noise-free signal for any type of audio system.

This Quick Start Guide will get you going, but if you need additional help or information, please visit our website or contact Technical Support.

### Features & Wiring Information

**NOTES:**  
**LOAD SELECT-** Some late model Dodge/Chrysler/Jeep/Ram/Fiat vehicles require a load for the audio system to work properly:  
 20 Ω - Vehicles equipped with base audio system.  
 60 Ω - Vehicles equipped with premium amplified audio system.  
 20 kΩ - Default, for all other vehicle applications.

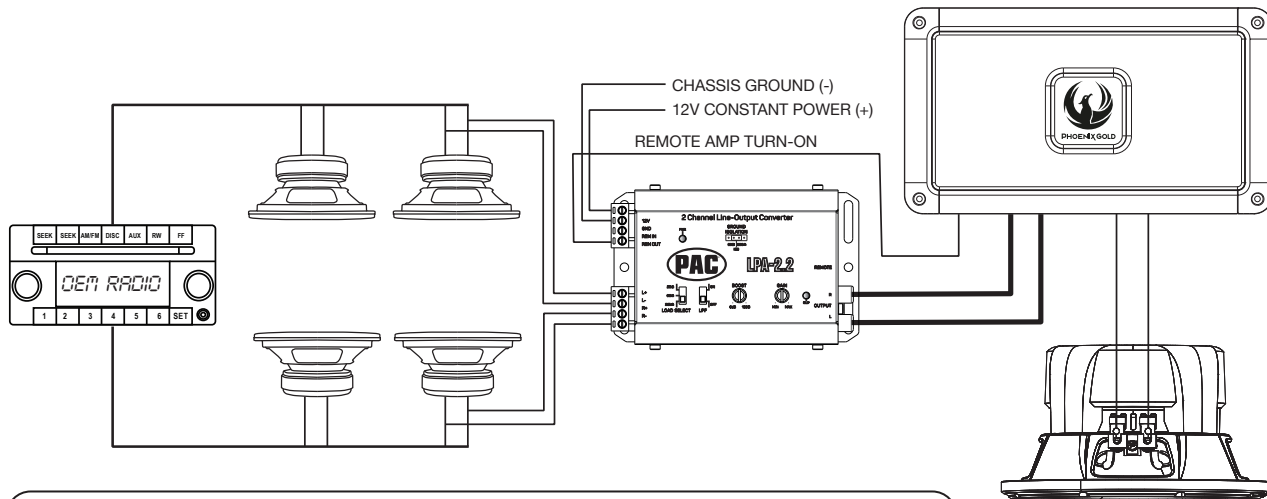

When changing the Load, turn vehicle off, change the Load and let vehicle sit for 5-10 minutes, then retry.

**REMOTE-** It is always optimal to adjust the gain at the output side of the amplifier, thus it's recommended to use the Amplifier's Remote Knob when available.

## Example Installation

Speaker level input from a radio to RCA level output for an aftermarket amplifier is the most commonly used configuration for the L.O.C.PRO ADVANCED. This will create RCA level outputs from a radio that only has speaker level outputs.

In the example below, the Positive(+) and Negative(-) wires of two speakers are “tapped” and connected to the SPEAKER SIGNAL INPUTS of the LPA. The speakers will continue to play as normal. The REM OUT is connected to the amplifiers turn-on. When the radio is turned on the LPA will automatically turn on the amplifier. Lastly, the RCA SIGNAL OUTPUTS from the LPA are connected to the aftermarket amplifiers inputs.

## Specifications

Model Number	LPA-2.2	LPA-2.4
Channels	2 IN — 2 OUT	2 IN — 4 OUT
Operating Voltage	9V — 16V	9V-16V
Max Input Level (20kH $\Omega$ Load Setting)	40V / 400W @ 4 Ohms	40V / 400W @ 4 Ohms
Auto Turn On	DC Offset / Remote	DC Offset / Remote
Output Voltage MAX @ 13.8V	9.5V RMS	9.5V RMS
Turn On Trigger (DC-Offset)	3V — 7V	3V — 7V
Load Input Impedance	20 $\Omega$ , 60 $\Omega$ , 20K $\Omega$	20 $\Omega$ , 60 $\Omega$ , 20K $\Omega$
Output Impedance	<120 $\Omega$	<120 $\Omega$
Variable Gain Adjustment	-28dB — +1dB	-28dB — +1dB
Signal To Noise	>110dBA @ 6.4V Output	>110dBA @ 6.4V Output
THD+N	< 0.01%	< 0.01%
Input Sensitivity	0.5V — 40V	0.5V — 40V
Frequency Response	10Hz — 20kHz	10Hz — 20kHz
Current Draw (Max)	40mA	40mA
Low Pass Filter	<250Hz	<250Hz
Bass Boost	0dB to +12dB	0dB to +12dB
Clip Indicator	YES	YES
Remote Level Control	OPTIONAL (PN: LPA-REM)	OPTIONAL (PN: LPA-REM)
Chassis Type	Stamped Steel	Stamped Steel
Terminal Gauge	18AWG / Quick Connect	18AWG / Quick Connect
